The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

For a petition to be considered valid it must:

- 1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
- 2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
- 3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
- 4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Application # : FW-24401

Stream : Sugar Creek

Applicant : David A Reynolds

7819 Alexander Street Acton, IN 46259-1503

Description

: A 30' x 60' area will be filled in the east floodplain of Sugar creek. The fill will vary in depth from 72" on the landward side to approximately 3' on the streamward side. It will be placed between the foundation of an existing structure, and be contained on the stream side by concrete slabs. The fill material will be obtained from a pipe line construction project, and trucked to the site. The fill will continue south from the south end of the existing structure about 30 feet and be contoured to conform with the existing creek bank. Large landscaping boulders will be used on the south end to secure the fill near the creek bank. The fill is intended to stabilize the foundation of an existing structure, and minimize any further bank erosion. Details of the project are contained in information received electronically at the Division of Water on July 5, 2007 and in plans and information received at

the Division of Water on

Location : project is located at 4937 N London Rd on the west side of london Rd between

the road and Sugar Creek. The fill will be added conecting to existing fill to the northof the house between the house and the creek, extending south past the house aprox 30 feet. the deapthwill be about 72" at the house to 48" neat the

creek

Stream : Thompson Ditch

Applicant : Vigo County Board of Commissioners

3250 East Haythorne Avenue

Jerry Netherlain, PE

Terre Haute, IN 47805-2108

Description : The existing three-span, concrete box beam bridge will be replaced with a new

structure on a raised alignment. The horizontal alignment will be approximately 40' of the existing alignment. The new structure will be a single span, Type III concrete I-beam bridge with a span length of 77.4', an out-to-out length of 72.5',

and a clear roadway width of 69.5'. The approach roads will be raised a

maximum of 6.5' above the existing approaches. The spill through abutments will

have 2:1 sideslopes armored with riprap placed over geotextile fabric. The abutments will be skewed 20 degrees to align with streamflow. The existing structure will be completely removed. Details of the project are contained in information and plans received at the Division of Water on July 10, 2007.

Stream : Vestal Ditch

: Noblesville Parks & Recreation **Applicant**

Don Seal

701 Cicero Road

Noblesville, IN 46060-1441

Description

: A 1000' x 250' area will be filled in the west floodplain of Emily Vestal Drain for the James A. Dillon Park-Phase II. The fill will vary in depth from 4" on the landward side to approximately 0' on the streamward side. James A. Dillon Park-Phase II consists of parking, internal drives, events lawn, utility connections, disc golf course, skate park, support buildings, amenities, and landscaping. All construction will be constructed along the west bank of the Emily Vestal Drain. Floodway construction activities include a Bioretention Facility (0.065 ac.-ft.) with an existing overflow structure; approximately 0.20 of parking lot; 900' of a 10' wide pedestrian walk, six (6) disc golf holes; three (3) shallow ponding areas with 6" underdrain systems outletting into the Emily Vestal Drain. Details of the project are contained in information received electronically at the Division of Water on July 25, 2007 and in plans and information received at the Division of Water on

Lake : Little Chapman Lake

Applicant : Jerry A Eisaman

21 EMS C19 Ln

Warsaw, IN 46582-9194

Delores Davis 9 EMS C19 Lane

Warsaw, IN 46582-9194

Description

: An existing 50' wide by 200' long channel off Little Chapman Lake will be restored to its original condition to improve navigation. Approximately 3' of accumulated muck and debris will be removed from the channel bed by dredging to a depth of 6' below the legal level of the lake at the center of the channel and sloping uniformly to a depth of 3' at the shoreline. The excavated material will be transported to an upland containment area for dewatering and disposal. Water from the containment area will not be allowed to return to the lake. This application will coincide with other permits being issued on Big and Little Chapman Lakes. Details of the project are contained in information received electronically at the Division of Water on July 23, 2007 and in plans and

information received at the Division of Water on

Location Channel exists on the Northeast side of Little Chapman Lake between C9 and

C19A EMS lanes, off Chapman Lake Road

near Warsaw, Plain Township, Kosciusko County
